

The Miracle Is In Believing

Dr. Carlos Blair

And I say good evening and God bless you one and all. It is indeed my pleasure once again having this opportunity of manifesting in this manner. And as I come forth, I come forth with the realization that through this opportunity that man in the physical body might in some small way find his path a little more direct, a little more fulfilling, and a little more enjoyable. I'm Dr. Carlos Blair and as you probably have recognized I'm a little bit English but I hope you won't hold that too much against me, and I want to welcome all of those, especially the ones who are here for the first time.

This evening I've chosen to speak on a subject that I feel is necessary and much needed at this time in your world. And that is the realization of the fact that while miracles have indeed been taking place since the beginning of time, that the miracle is really in believing.

Man many years in the past when he first came into the physical body as a mortal individual, came with very limited and very little understanding as it were. He was not born into the body with functions of the mind and the brain as it were, to the extent that it is in this your time. But to the contrary with great limitations there-on, and therefore he had very little more than the animal instinct, as you might refer to it, rather than that of the conscious levels of man. However, over the many periods of time since the beginning of man, he has learned to evolve and develop, as it were, into a very high indeed intellectual, and as a result has brought many things new into being in what you refer to as your world.

It is come from the very beginning stages of the recognizing of the utilizing of the fire, as it were, from the cave man, as you might refer to it. To the man who finally came forth with that of the wheel, and that of the fulcrum, and the various levels of invention, as it were, right on up to the time where it came into mans ability to have the insights, as such, to come

forth with that you would refer to as new innovations or inventions, that came to him from out of the great nowhere into the great somewhere. And thereby, brought forth such evolvement as that of man's utilizing of electricity and all the other various modes that you find within your world today.

It is not that God has at any time limited any souls. It is only that the soul has been limited by itself, by its society, by its environment, as well as its philosophies. It is not as though God at this time is placing limitations on man. Man today through his own ability to believe has the capability of attaining all that there is to know in the universe, in the entirety of the cosmos, as it were. If he could but set aside the thoughts of society, if he dared, as it were, to be different, not to conform, necessarily, to the concepts that society and mankind have placed upon him. There are certain things which man creates and society creates as far as guidelines, that man feels as though he is bound by, and must therefore live within. These are his greatest of all limitations. Every great one that you can go back to in your time of the written word, what you refer to as history, you will find, whether it be that of the painter, that of the inventor, that of the pianist or the musician, as it were, the composer. No matter what art form, no matter what area it was in, that individual at the time of their being in the physical body were invariably looked upon by society as being indeed outcasts, as being queer or odd, as you might say, as not fitting in. And that was because they were concerned with their belief within themselves in the full recognition that they were indeed a part of God, that as a part of God that all was available. And man then chose to refer to them as crackpots, as it were. It was though such as this, who came forth, who were not as it's said, joiners, who were not content with being passive and just blending in, as it were, with the thoughts of society.

Every great teacher including the greatest of all, that of Jesus Christ, came into the world and was looked upon by the majorities by far, as being strange, as being an outcast, as being a renegade, as being turned against society or people as a whole. They were persecuted from the beginning. All of the greatness that man strives for, he measures with the wrong yardstick. He looks to be great within his world, within the eyes of his fellow man, that indeed if I go forth, and fulfill the expectations of society and I find that

through so doing I become-I come into the position of that of having the doctorate as it were, or that of the professorship or that of great recognition by man, that he indeed is successful. There could not be any concept further from the truth. The only fulfillment of success in a physical body is attaining a greater and closer a-one-ness with God. And in many instances that does not mean you are in the majorities of people, but rather in the minorities. Do not fear for being different. When you are no longer of the world, but that you are indeed of God Almighty, and you come into that full understanding and awareness, and you believe that you are indeed that son of God, that by virtue of that you have no limitations what so ever, and you reach out accordingly you will indeed find that what you reach for will indeed be brought into fullness and fulfillment.

Christ taught it when he was in the physical body, as many others have in the past. When he said, “whatever you ask in my name it shall be given onto you.” He said, “whatever you ask believing, it shall be given onto you.”

I know this very night my medium had spoken with you in relationship to that of healing, being an instrument for healing. If you indeed are not concerned about the concepts of what society might think, but are truly involved with you're a-one-ness with God and recognizing and believing that you are indeed a part of that over all whole, and that through that you have the right and the power to be utilized in that manner, that through the laying on of the hands of another they will indeed be healed, you would find without any exception, they would be healed, as long as it was not in contrast with the will of God.

If you came into your awareness of your true nature in the relationship with the Godhead of the universe you would come into the realization that you are indeed a very part of the energy of the very power that holds the heavens together, as it were. That power is unlimited. But it must be that you come into that realization not hoping, not with great doubts, but believing that as you reach forward it will be fulfilled. Nothing that man has invented as it were, could have come into being had it not been for the individual and their belief in the fact that it was going to work. Can you imagine where mankind would be today in your world if it had not been for

those who had the foresight and the intestinal fortitude, as it were, to stand up against the masses in spite of the ridicule and say, “I know, I believe and I will go forth and bring it into being”. The one who set forth in the tiny boats, as it were, and found this great land in which you live upon the face of the earth, did so believing Christ when he walked the earth--he did not come into the body as he said for the purpose of merely bringing love, but he said that he came with the sword, and he indeed was not looked upon as being a great one during his time by the majorities. But he went forth, believing that that which he came to do must be fulfilled and could be fulfilled. And indeed because of his beliefs it was and is being fulfilled.

If you are one who wakes in the morning and you’re saying to yourself or to others, “well I cannot carry on this way another day”, you won’t be able to. If you’re saying to yourself or to others, “I can’t attain this,” you won’t be disappointed at all, because you won’t be able to.

To the contrary, recognizing and realizing that with God, and indeed I am part of God, that all things are possible, then I can move forth believing that that which I am going to do will be fulfilled. These are what man refers to in your day as the miracles that are being performed. They are indeed not miracles. It is merely God working in the capacity that man was meant to serve in, as his servant.

It is like when my medium places the tapes and the blindfolds on his eyes. Had he done so not believing that he would be able to see, he wouldn’t have. But he places them there knowing, believing that he will see, and he does.

Man has been so fraught and so misled by the popular concepts of society that he has not only limited himself, but he has allowed the society as a whole to limit him as well. And in man being limited places limitations also with God. So the miracle is not in the miracle. The miracle is in believing.

It has been taught so many times and said so many ways by so many great teachers of the past, it has been said that as a man thinketh in his heart, so it is. It has been said in every conceivable way and still man fails to see the importance and the significance of the unlimitedness of his capabilities

in a physical body, only because he doesn't understand the importance of truly believing.

God Bless you one and all. And now I believe that I should have-see, I believe that I should have-stimulated a few questions in the area. In fact I thought it might be one that would get a lot of them going. So I'll certainly accept any questions pertaining to the subject I've just spoken on. But please limit it to that because of our time. The one who is among you this night that could indeed speak quite well and not only speak but serve as the very example of belief is the one who's in front of the medium, the one who is the Reverend Holloway, because here is an example of belief.

(long pause)

I will allow other questions. (long pause) My goodness David, I've done it again. You mean there's no questions about....you're all going to tomorrow morning, no tonight, you're all going to go out and come into your own awareness of your beliefs in God and your ability as that in fulfilling whatever you choose. Then if that be the case, you certainly have spent your time well this evening. I'm teasing a little bit, yes.

Question: How do we strengthen our faith?

Dr. Blair: Faith and belief are two separate entities. Faith comes about primarily through man's searching within himself. And reflecting upon that which has happened to him in the past and through that and seeing what has happened to others, as well, he finds that he can learn to put faith in certain things. But faith is certainly very limited, where believing has no need for limitation.

Question: How do we strengthen our believing and change our believing?

Dr. Blair: It is through your own conscious awareness of that of holding the positive thoughts and not being concerned with being in full acceptance by the majorities of people. You see many look upon my medium as not being mentally quite all there, you understand what I'm saying? They look at him and they say, "well, that guys a little bit...well he's not...he's playing a little short there." Well that's all right, it doesn't bother him. Because he has learned through the years, and there's no doubt because he has had the

experience of seeing spirit many times, and the spirit world in all aspects, to where believing is just the natural thing. Disbelief would be difficult for him in this area now, do you understand what I'm saying?

Response: Yes, thank you Dr. Blair.

Question: What about the concepts of false beliefs?

Dr. Blair: I'm sorry, I did not hear the question.

Response: The concept of false beliefs, believing the wrong direction?

Dr. Blair: It is indeed better to at least have the positive assertiveness of false beliefs and be in that of misunderstanding, but be sincere with it, than it is to have no beliefs at all. Where there are false beliefs, that indicates that the individual does indeed have the capacity at least to believe. Now all it is, a matter of seeing the light, as it were, and setting aside what he recognized at one time as being truth, and realizing he has indeed come into a new truth. Not at all unlike those who came forth at the time of Christ, who came with a new dispensation. And many of the beliefs that had previously been, while the majority were indeed very much intact, he did also bring greater awareness and understanding. As an example, man evolves at the level of his own understanding at any given point in his existence in a physical body. Therefore when Moses came forth with the mosaic law that said, 'an eye for an eye and tooth for a tooth,' that was indeed proper for the level of the understanding of the peoples of that time. However when Christ came forth knowing full well that it would be jeered by the majorities, he said, "I say not an eye for any eye and a tooth for a tooth, but if the man smites you on one cheek, turn the other". He brought a new dispensation because at that time the understanding of man was ready for it. Do you understand what I'm saying? So if you find yourself with false or misleading understanding you have to have come into the awareness of that before it becomes a false understanding. That means you have indeed made some spiritual growth and evolvment. Yes.

Question: Are we to believe then that even false beliefs lead in spiritual growth?

Dr. Blair: Yes of course. My medium when he was a young man he was petrified, as it were, of this place that most of the religions, the one he was involved with at that time, taught about, this one that is referred to as hell. And the concept by the manner in which it was taught, that was definitely a very strong belief within himself. And it was very fearful and frightening, as it were. But as he evolved in his own awareness and understanding, then he realized that it wasn't quite as it had been given. Yes.

Question: How do we know when you've found your faith in God and will you explain_____?

Dr. Blair: Well I'll try to do it as best I can child, in the time that I have, which isn't much. But your faith in God- recognizing it- is when you find within yourself no room for anything other than, predominately, that of Love, of all peoples. And you find at the same time an inner peace and inner tranquility within, that nothing around you is upsetting. Then you realize you have indeed come into you're a-one-ness with your God. Yes. And as far as here in spirit, it would take much too long for me to speak on it in detail, as it should be. It is not a great deal different than your world, as it were. Only that it is so much more basking in the light of God, so much love, so much harmony, so much positive, there's no negativity here in spirit.

Question: My grandmother just died-does it mean she'll be all right and everything?

Dr. Blair: By all means. You mean she got rid of the old body that was worn out? Yes, she has a new spiritual one. And she'll be much better than she was in the old physical one, yes. Certainly she's closer to God now.

Question: Have you seen God?

Dr. Blair: There is a question! You see these young people have very good minds, as it were. And there's a question that is very valid and very well founded. Child, in the concept, and I wouldn't want to take away from anyone's concept of their God, but your referring in your question as though have I seen God as in the image of man and I would have to say to that, no. But I have indeed had the opportunity to share in the a-one-ness with God and I have indeed had the opportunity, as I do at all times, to be in the light

of God. And so I see God in that sense around and about at all times, yes. But not in that of the physical form of a man. I see it in the love and heart of a child for its mother or for its father; I see it in the love that one expresses to another. I see it in the beauty in all of nature.

David, how's the time, the Rock's getting nervous? Well that's what he said. I'm telling you we shouldn't have taught that Indian to tell time. Yes.

Well it has indeed again been a pleasure for me to have this opportunity of manifesting once again in this manner. And I do hope that which I've spoken on this evening might cause each of you to look within and look about yourselves and realize that it is better to be the leader than to be the follower. Don't be led by the masses. Don't be afraid, as it were, to be looked upon with consternation, as it were, by your fellow man, because the great of the greatness has always been the one that was dared to be a little different. So it's all right if you want to be a little eccentric, have no concern for it, because in all probability you're one of Gods very special ones and you're manifesting it very well. If man doesn't stand in terms of the masses in full acceptance of your concepts, be bothered by it not. Because in all probability, you have much greater truth and insight than the mere majorities.

It has been a pleasure and as I leave I ask only that God pour forth his richest of all blessings upon each and every one of you here. May you ever walk in his light and know his love, but most of all may you be filled with his peace. God Bless you one and all.
