

037 Man the Creator

Dr. Carlos Blair

And I say good evening to you one and all. Well it is indeed a pleasure for me to have the opportunity of manifesting once again in this manner. And I am Dr. Carlos Blair and I hope you don't mind but I'm a little bit English but I think you'll be able to bear with me.

It seems as though this night that I do wish to speak on a very important area that man needs to have awareness of to a greater extent than what he gives thought to and that is, I would like to speak about man the creator rather than God the Creator.

It seems that man does not want to fully accept his responsibilities in the physical body as that of a creator and indeed as it has been taught for so very long that man is indeed created in the image of God Almighty and as a result when God had indeed created the universe and everything that was in it, that he gave man dominion over it, and man should be into the highest form of intellect that is manifesting in your world. But still man, given the opportunity and the ability to serve in the capacities of that of a creator, does not only misuse, but most times does not even recognize his role as such.

Man creates constantly, daily, hourly almost to the point of being minutely, because of the processes of creation, of course, are always brought into being primarily in thought form in the beginning. Man must perceive the idea or the thought, and it is created in that sense first. Once it has been created there of course, then it is brought into creation as man accepts it as creation because it's in the solid form, as it were, by his actions or his deeds.

Man too many times though limits himself as the creator. He not only limits himself but he does not take or accept the responsibility for that which he creates. Man is too quick sometimes to create without giving thought to what it will ultimately entail or mean in terms of his own existence. Man does create not only by his thoughts but his actions, his words, his deeds, as well. If man could come into the realization that indeed the circumstances he finds himself in at any given moment in time are indeed for the most part self-created. Maybe not at that particular moment, it may indeed have been created or put into creation some many months or possibly even years prior to the time that it manifests in a physical sense.

If man finds himself with abundance he has indeed created himself an abundance. If man has found himself in being in a situation of that of being destitute, as it were, he has indeed created that for himself, either previously or at that given moment in time. If man is happy, he has created happiness within himself. If he is sad, he has created it for himself by his thoughts, words, actions and deeds.

Man gets into the concept that you in your world refer to as that of ideas or inventions. And he perceives in most instances at the spiritual level the idea and then through that he goes about through his actions creating, as it were, the actual reality. Many times however he does so with too much of a limitation of thought as to the end results of that which he creates. As an example one of the problems that's in your world today that mankind is beset by, more so than nearly anything else, is that of the loss of the natural resources. When man found that he could create electricity he did not give a great enough level of thought into the process of creating it to realize that it would one day indeed deplete, as it were, many of the natural resources of your world. He did not contemplate that in the process of it, that it would bring about great levels of pollution in your atmosphere. It is only after the fact when he has recognized and become aware of the problem that he sets forth then to rectify it as a last means, as it were, through utilizing the energy of the solar system, the sun and various other natural forms that first of all will not be depleted, and secondly do not in any way involve pollution of the atmosphere.

Man through his levels of intellect, has created the means, by which to, as you refer to it, split the atom. He has indeed evolved from that into creating great nuclear energy. But doing so without giving enough thought to the varying and many ways that it would affect not only mankind in the confines of the area in which you live, but in the very universe itself. And then he creates the monster, realizes he has done so, and then tries to concern himself-now how do I control it? If he were creating properly he would have taken the time not only to come into the realization of how to go about it but to have the awareness of the effects of it as well, prior to bringing it into being.

It is not at all like the man who on the first day of the week receives his ration of food that must last him for the entire period. And he sits down the first day and indeed has a great feast. And then by the time he reaches to the end of the week, he finds that he is indeed starving. It was due to the fact that he did not give thought beyond the moment. He did not give thought to what he was creating. His lack was indeed created by himself as was his unneeded abundance at the beginning of the week.

These are mere examples, but man indeed creates his own happiness, his own unhappiness. Man creates indeed, love with himself and others or hatred in self and others. Man indeed is responsible for the creating of his own spiritual a-one-ness with his god or not creating it, as he chooses. Man is the creator as God is, it is not only the proliferation of children of the population as you know it to be, that man was made in God's image as a creator. Everything in your universe that you see coming about on a regular basis, for the most part is being brought forth in the manifestation as a creation of man. If the farmer indeed does not plant the seed then he cannot indeed reap the harvest. In that sense he is the creator. If he did not plant the seed he creates his own lack. If he does plant the seed he creates his abundance.

If man does not consider very carefully the concepts of his own thoughts, of his own inner awareness prior to placing it into the form of action, then he is creating blindly. And might well find that when he has indeed completed the creation of it, that it is not at all what he wanted because it was magnified to a much greater extent than he had indeed anticipated.

My medium is one who does this on a rather regular basis. He creates, as it were, situations and then when they come into being he looks upon them and says, “but God why do you place this on me at this time?” When in reality God had nothing to do with it. It was of his own creation. Man is God, God is man, as God is indeed the creator, man also is indeed a creator.

It would behoove each of you to give serious thought to not only your actions, your deeds, your words, but even more important, your thought processes. Because it is through these that all things in the beginning start formalizing creation. And remember that when you find that there is indeed a problem that besets you, a lack possibly, as it were, or possibly even that of an annoying abundance, that you yourself, not God, but you have brought it into being. It is indeed your responsibility to care for that which you have created.

It is like the man who goes forth and has the opportunity and therefore through the opportunity brings into your world several children and then would turn his back upon them and say but they’re not my responsibility. When in reality he was the creator. That which you create you have responsibility for. Do not expect God or someone else to carry your burden of responsibility for your own creations.

As I have mentioned in lectures previously on ‘thoughts are things’ and ‘the reality of the power of thought of mind,’ it lends credence to the realization that it is through that process that man indeed is the great creator. Watch your thoughts. God Bless you all.

And now I think I might have stimulated some questions pertaining to the subject, as it were.

Question: Your main point is to me very clear, but I would like a little more about what you meant about the nuclear power plants affecting the universe.

Dr. Blair: Well indeed, that if it is not closely controlled that it would become rather than an asset to the world and society as you know it, could indeed be, to the contrary, a very great devastation and detriment. And man did not give careful thought to that prior to the time that he brought it into existence. He could only see the potential of, “my goodness look at all this additional power and this source for it”. But he did not carefully examine the other portion of the responsibility. It’s not at all unlike the young man who marries and the young woman, you know it does take two. And without thought or consideration, have a couple of children, as it were. With no awareness whatsoever of the financial, the stress, the strain, the work, the

responsibility involved with it. It is not only there for that moment but is there for the very existence of their time in the physical body.

Question: Are you referring to the hazards of the radioactive waste and the danger of...

Dr. Blair: Yes of course!

Question: Dr. Blair, good evening.

Dr. Blair: Well good evening there, it almost sounds like a fellow countryman, does it not? And you do have it. So you do that tomorrow. You understand?

Response: Yes I understand, Dr. Blair, thank you.

Dr. Blair: Now I'd like you to ask whatever question you had.

Response: It put me off for a moment.

Dr. Blair: Yes I know but it will involve a trip. It think it's going to be right about the holiday. Yes.

Response: Thank you. The question I was going to ask is twofold. Man the creation of man seems to be designed primarily for immediate financial gain or subsequent destruction, does this not put in fact, mans creation in conflict with Gods creation?

Dr. Blair: Most definitely it does. That's the very reason that I've spoken on the subject. It's hopefully that man will realize that's his responsibility, in his creating. Yes, most definitely.

Question: I'm thinking about too, sometimes when we want something and we think we're going to create it by our thoughts, and so on, and that there are times when it's so important to before we decide exactly what we want to meditate on it and be very careful what we put out that we want. Again going back to the thing of creating something you don't want.

Dr. Blair: Most definitely and the medium you know, he calls that leaving himself the hole to crawl out of. He says I think that's what I want, but then he says and thy will be done, not mine. That's the hole to crawl out of. Before you ask God for it you better realize that you'll probably get it. So you better say, and thy will be done, not mine, yes, then you have a hole to crawl out of. Cause if you just say, "God, I want that," you'll probably get it and you may realize once you have it that that wasn't what you really needed at all. Yes.

Question: Once you have it and you realize that you didn't want it, are you therefore stuck with it?

Dr. Blair: You're stuck with the responsibilities of it yes indeed. You see my medium when he was a small-a very young man, told his mother who was visiting on vacation, as you call it, over

here holiday, we call it there, that was going on holiday to what you call Florida and he laughingly, jokingly said, “send me an alligator,” and she did. And I can assure you he certainly was not anticipating it, and yes he did have the responsibility of it. And he didn’t like the responsibility that came with it either. So be careful what you ask for. Yes.

How’s the time David? Well, we’re doing it pretty well. Now I guess we pretty well dissected the concept of being your creator, so I guess I’ll open it up to other questions for a few moments.

Question: I have a question, it has to do with a light that I’m beginning to see and I’m sure other people are beginning to see it now too. It seems like it’s coming in then it’s a very bright and it’s a blue greenish color and it’s not like an earth color, so other people who are now seeing it and I wonder if you could explain it, what that means?

Dr. Blair: Well I could but I’m afraid it’ll involve considerable more time, however I will attempt too. As you well know as I’ve spoken of in the past here in this little place in which you live you know, the city you call it, in this area of the country, there is indeed in-coming to it, very rapidly a much higher spiritual vibratory rate that is incoming and that is going to be changing vibratory levels in the whole area, and as that takes place, there’s going to be varying changes that will come in the awareness levels of the majorities of the people in this place. And this is a part of that overall process. It’s opening the awareness, for the lack of a better statement.

Question: Excuse me Dr. Blair but when you say this area what geographical area are you speaking of?

Dr. Blair: This one in which I’ve had the medium come to for the purpose of starting the little church. Yes. What you call Arizona, but most especially here. And New Mexico as well.

Response: It would seem rather limiting the people to only have this going on in one area, would it not?

Dr. Blair: Not at all, going on only in this one area, it is no different as it were, than the temperature, as an example. In this area there is the warm temperature, what you call the warm temperature, I call it the very hot temperature when it’s in what you call the summer, but the unbearable, I would say if I was in a physical body. But none the less you have, comparatively speaking, to the other areas of your country, you have the warmth all of the time, you see what I’m saying? That does not mean they don’t also have warmth, but it is not to the same degree. It is more concentrated here than it is there.

Response: Yes I understand that.

Dr. Blair: This is a focal point yes, for it. Part of it has to do with the terrain of the area, the arid portions of the desert as well as its location in the universe.

Question: Are there in fact other places that it is concentrated on?

Dr. Blair: Yes indeed, in other parts of the world as it were. Yes. But not in this country.

Question: Does this area have a different electromagnetic activity, Dr. Blair?

Dr. Blair: Yes of course, the vibratory levels are completely different, as it were. That's why when people come to this place, you know, they either like it and think it's wow, it's the greatest, or they can't stand it. There's not too many in-betweens. Because either they like the vibratory levels or they don't, just like that.

Question: Is this a relatively new thing Dr. Blair?

Dr. Blair: Of course I don't-I'm not quite aware of what you refer to as relatively.

Response: Within a life span.

Dr. Blair: Who's life span?

Response: Mine not yours.

Dr. Blair: Well that, see that's what the questions all about, but I would say even beyond that, yes. Relatively new is like that of the medium's little one, yes.

Question: Does spirit stay in heaven, is there a heaven and if they are they are free to come and go into our world?

Dr. Blair: Well I think this is heaven and I'm in your world.

Response: Well I don't care much for Arizona so it's not heaven to me.

Dr. Blair: Well it doesn't bother me, it's just the mediums body that gets hot and uncomfortable and all chapped, it doesn't bother me in the least.

Response: I've seen shows on television, narratives, things like that, that say people have seen the hereafter. Is there such a place?

Dr. Blair: Yes, that's where I am.

Response: And you're free to come and go?

Dr. Blair: Well certainly. I don't have, in spirit child, we have no time or space as it were. You see I've previously been asked the question. Do I believe in space beings? And I just very lightly say by all means, I am one. By thought I can be anywhere in the universe, in the entire

cosmos. So therefore there is no time or space here. So if you wanted you could say, yes, I am a space being. But in reality I think it's more realistic to refer to it as the fact that I am indeed spirit.

Question: It's not really a question, but more of a comment. You mentioned that we had a concentration of this spirit here in Tucson and I would like to say that I'm-the spirit involved must be concentrated in this small church, I hope will grow and expand.

Dr. Blair: It will be so far beyond the expectations of my medium or anyone else here, in fact when I sometimes refer to it with him, that's what makes his hair turn gray. He says "but wait a minute Doc, don't get carried away". But yes, it will. And I might add you'll find yourself as being a very integral part in that. You see I could tell all kinds of tales out of school, but I better hadn't . Yes. But you know what you're going to do with the medium, don't you? You know what you're talking about, the pictures?

Response: Yes.

Dr. Blair: Well there's another one that's already coming sooner. Yes. But it won't be in this country. They're coming to get him, well not to get him, I better clarify that, I'll get everybody all nervous. They're going to come to put him on film to take to the place you call Austria, yes. For what you call t.v. Yes. But he's not going there, he's staying here.

Yes the Rock is a little nervous about the time David. He says it's right there. Yes. I'll take that last question now.

Question: Only a simple question, does spirit...

Dr. Blair: I'll give a simple answer.

Question: The spirit of animals, do they exist and if so in tune with man's spirit?

Dr. Blair: Well certainly. Do they exist here in your world? If one comes up and bites you on the leg you say, "hey he's there," don't you? Well of course they're here, they're Gods creation. Yes.

Response: Thank You.

Dr. Blair: Most definitely, it is a good question by the way. Not one-I treated it lightly, but yes it is indeed.

Now I believe that I best take leave of the body. And it has indeed been my pleasure and for those of you that haven't had-I haven't had the opportunity of speaking with before, I especially want to welcome you and hope that possibly in the future you'll have the opportunity to join us once again. It has been my pleasure and as I leave I ask only that God pour forth his

richest of blessings upon each and every one of you and may you ever walk in his light and know his love. But most of all may you be filled with his peace. God bless you one and all.
